

# Credentials

By using recycled plastic waste, we are helping to lower the amount of waste going to landfill and into our oceans each year. We, and you as our customer, in 2017 saved over 200 tonnes of plastic being dumped in landfill.

Although we are a relatively small company we are proud to have held the international ISO quality standard 9001 since 2004.

We do not import or export plastic waste. The whole purpose of using recycled plastic, which was destined to UK landfill, is to make the process sustainable. Importing or exporting waste plastic around the globe would vastly increase its carbon footprint, making it unsustainable.

TDP tries to ensure that all aspects of its business have the least impact on the environment.

## PERFORMANCE BY DESIGN

- Strong and durable
- Impact resistant
- Rot proof
- Splinter proof
- Crack proof
- Vandal resistant
- Insect and animal resistant
- Chemical resistant
- UV resistant
- Water repellent
- Low flammability
- Non-toxic
- Dimensionally stable
- Can be cut, drilled, screwed, or bolted

## ENVIRONMENTAL CREDENTIALS

- 100% recycled
- 100% recyclable
- Manufactured predominately from UK waste

## COST BENEFITS / SUSTAINABILITY

- Reduced waste
- Reduced maintenance
- Less frequent replacement
- Lower whole-life costs

# Outdoor furniture

All our products are created from recycled plastic waste

# TDP

#### DID YOU KNOW?

In the UK more and more people are recycling but we still only recycle 58% of our plastic bottles

## From plastic waste to maintenance free furniture

We know the recycled plastic material we use is of the highest quality and in itself will last for many decades, but our job is to make sure the design and manufacture of each piece of furniture does justice to the material. From how it looks and performs to the last nut, bolt and screw, our skilled team make every product as though we are going to take it home to use ourselves. In fact we have customers with benches made years ago which still look great today. From your first contact with us, to taking delivery, we want the whole experience to be both enjoyable and stress free. To help you reach a level of confidence

in us to place an order, we try to give as much useful information as possible here and on our web site. Alongside this brochure we have a printed, full range guide and price list available.

"We pride ourselves on producing quality products through recycling plastic waste which in-turn is beneficial to the environment"

## CASE STUDY

**CANVEY ISLAND**  
Canvey Bay Watch, a volunteer group from Canvey Island, wanted to clean up the beach to make it a great place for people to enjoy. The team wanted to provide seating along the promenade wall, but needed a sustainable product with minimal maintenance, and not be affected by the salt air. Our Peak bench matched their requirements. There are now over 80 benches here. Picnic tables with disabled access have also been placed on the beach.

**DID YOU KNOW?**  
Responsible recycling of plastics minimises the amount of plastic being sent to the UK's diminishing landfill sites

# Seats and benches

From the modern to the classic, our recycled bench range offers it all. With different seat heights and back rake for comfort, some have arms and some are backless. These benches and seats will outlast any timber alternative whilst maintaining the look of wood. With no painting or staining required, simply sit back and enjoy, they are splinter free!

## Chairs, tables and sets

You will not find it hard to choose a furniture set from our range. The benches and chairs are designed to compliment our tables in an array of combinations and colours. Whether you have a small courtyard area or a large space to fill we can satisfy your needs from a single chair and coffee table to a table and chair set to seat eight.

**DID YOU KNOW?**  
The TDP Derwent Chair uses 26,947 recycled plastic bottle tops.

### CASE STUDY

#### HOLIDAY COTTAGE - YORKSHIRE

A newly renovated farmhouse rented as a holiday cottage in Yorkshire benefited from the Denby table with Derwent chairs, and Peak benches. This site was particularly shady so wooden furniture would have had a very short lifespan. A huge benefit of recycled plastic furniture in properties that are holiday rentals is that the material does not swell or shrink in adverse weather conditions, so maintains its stability throughout its lifespan. The owner was delighted not to have to maintain this furniture every year.

## Personalised furniture

### Memorial, commemorative, engraving and plaques

All of our benches can be personalised with metal plaques or words physically carved into the recycled plastic plank.

This is a great idea for commemorating a loved one or personalising furniture for a village green or sports club. Local authorities and cemeteries are very keen on the idea that recycled plastic benches will not rot and require no maintenance.

### CASE STUDY

#### THE KNOCKERDOWN INN - ASHBOURNE

The Knockerdown Inn and Restaurant had a large number of wooden picnic tables that were rotting, and due to the time consuming repair and maintenance each year were looking to replace with a no maintenance solution, which could also be left out all year. After visiting our showroom they decided on the Springbank and Dovedale picnic tables. The robust and heavy duty material used in these picnic tables is ideal in such a demanding environment.

## Coloured and urban range

Coloured outdoor furniture is not just for our children's range, grownups like to add a splash of colour with our Bakewell range too. The array of options we offer will compliment any colour scheme in the garden or maybe a restaurant terrace.

The Urban range has been created for a real 'on trend' colour combination of grey and black, the contrast of the light and dark really gives these benches and tables a modern appeal, that will stand the test of time.

## CASE STUDY

### MELROSE

The Melrose in Bloom Group undertake the planting and maintenance of the planters in the town. The square and local businesses featured timber planters, which had to be taken in each year to dry out and be maintained, which was costly and labour intensive. They decided to look for a maintenance free and environmentally friendly alternative, with a long lifespan. The Ipstone planters are now left out all year as the material is weatherproof so they can maintain a floral appeal all year.

# Nature and garden products

Using recycled plastic for our nature and garden product range gives it several great advantages over traditional materials such as wood. The recycled plastic is impervious to water and resistant to algae, it does not require any surface treatments and does not rot making it maintenance free. Our bird tables and nest boxes are healthier for birds than wood as no mites can infiltrate the dense recycled plastic material. All of these products will certainly outlast any wooden planter or nest box you have ever purchased.

# Children's furniture

Our brightly coloured outdoor recycled plastic furniture is a big hit with children and adults alike, as it brightens up any space in any weather. Handcrafted with different seat heights, it will suit infant and junior children. All fixings are countersunk and edges rounded off to avoid sharp corners. The recycled plastic material is ideal as it will not splinter unlike timber alternatives. Our heavy robust designs make our furniture less likely to tip over in tough environments such as schools, parks and play areas. With 8 colours to choose from in a combination of your choice there is something to suit everyone.
